EXTREME GEAR PROTECTION

www.petrolbags.com

For over 10 years, Petrol Bags™, a Vitec Group brand, has been a leading producer of professional carrying bags, protective cases and accessories for HD, DV, and DSLR cameras and other production equipment.

Petrol Bags products combine detailed, innovative design, rugged construction and top quality materials – and are uniquely engineered for optimal carrying comfort, maximum storage and equipment protection.

Petrol Bags products are now available in three distinctive lines:

BLACK DECA

Created in honor of Petrol's 10th anniversary, the Black Deca line sets a new standard in professional bags and accessories.

DSLR IN MOTION

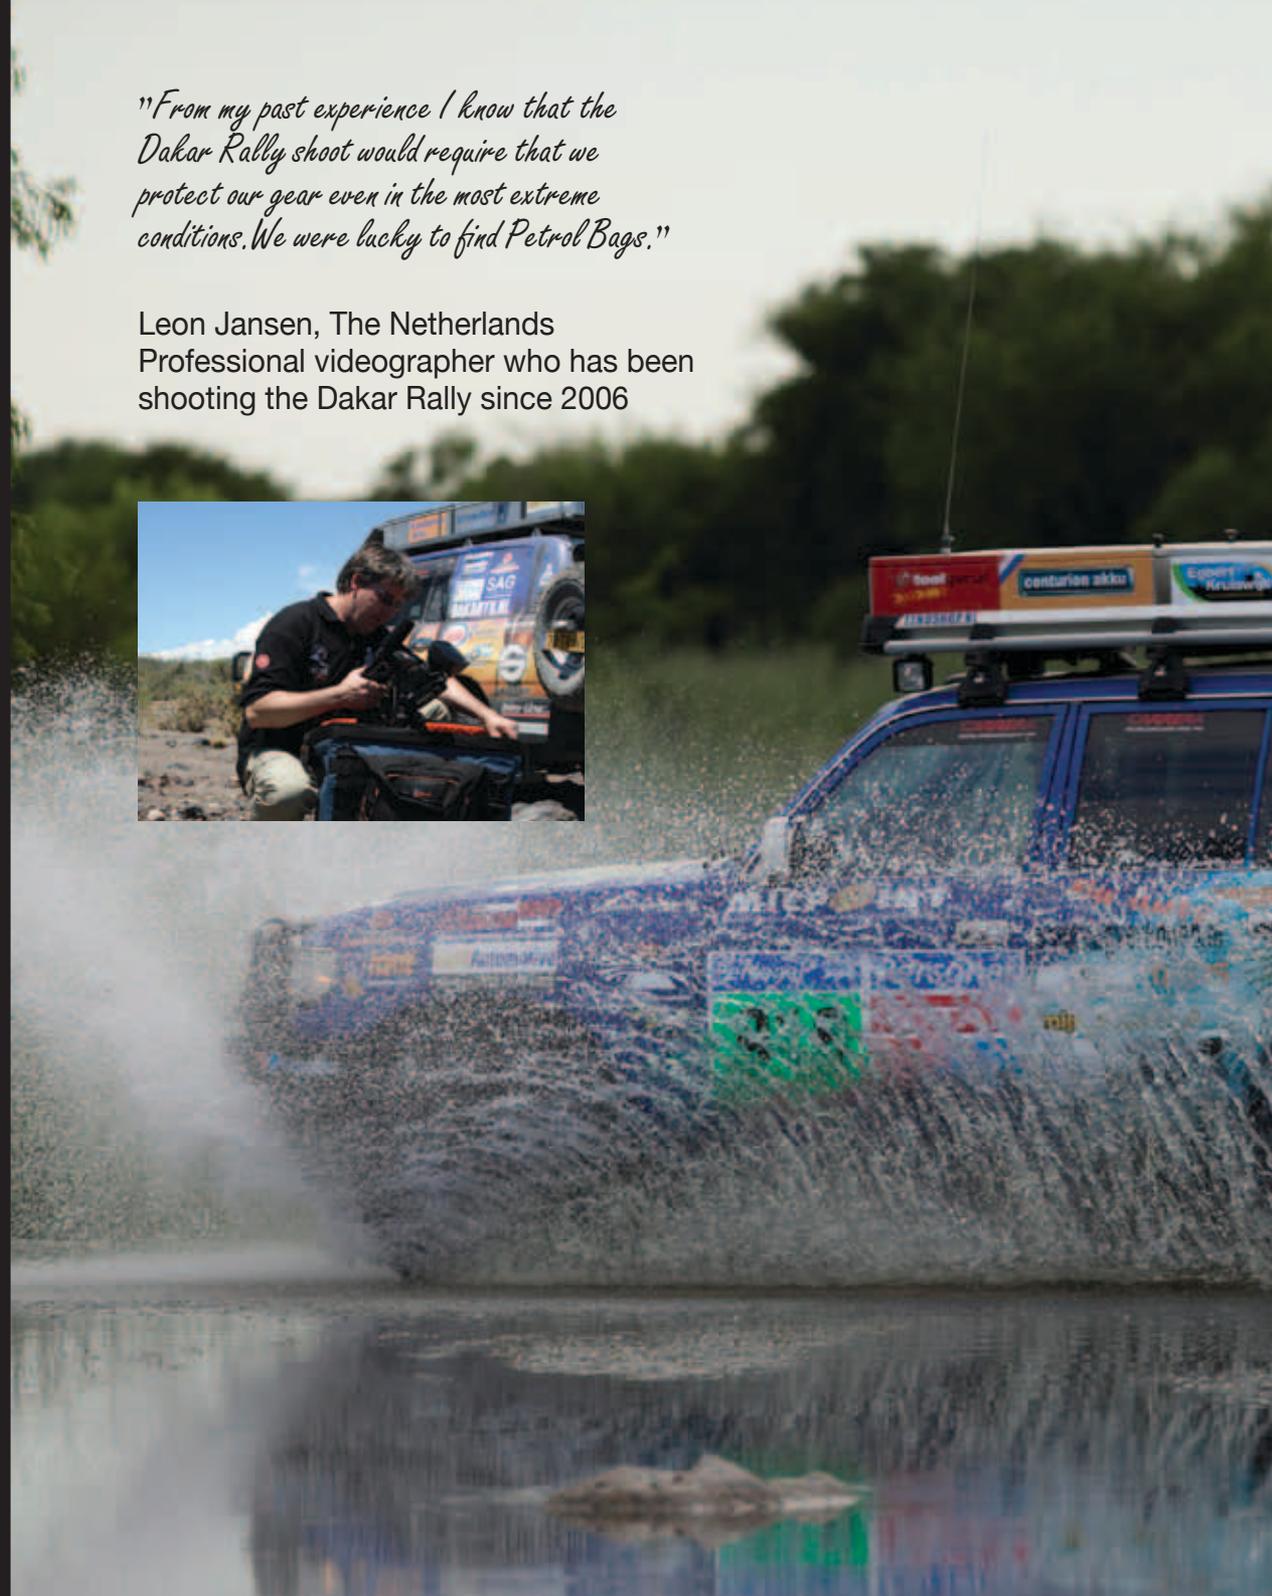

A new line specifically designed to meet the special needs of users of DSLR cameras. Featuring the same advanced design that have made Petrol Bags a long-standing industry favorite.

CAMBIO

Petrol Bags' groundbreaking Cambio allows users to travel lighter, avoid waiting for baggage, and set up more quickly once they've arrived at the location.

"From my past experience I know that the Dakar Rally shoot would require that we protect our gear even in the most extreme conditions. We were lucky to find Petrol Bags."

Leon Jansen, The Netherlands
Professional videographer who has been shooting the Dakar Rally since 2006

TECHNOLOGIES

MAXIMUM PROTECTION

Over 10 years ago, when Petrol Bags first started producing camera bags and cases, we set out to make the most comfortable carrying systems on the market while providing maximum protection for gear, even in the most extreme working conditions.

Working closely with industry professionals worldwide, our focus has been on creating products that don't just look good in a design lab, but function flawlessly in real world settings, providing the safety, convenience, reliability and durability that you and your equipment both deserve.

SAFE-SHELL

An essential feature of many of our camera bags, Petrol's proprietary Safe-Shell safeguards the camera's delicate viewfinder and microphone system. Cold-molded laminate plates reinforce a sturdy shock-proof chamber that automatically closes around the viewfinder to shelter it from jolts and jostles during transit.

Plus, there is no exterior protrusion to give away the valuable nature of the contents of your Petrol bag.

COVERUP ALL-ELEMENTS PROTECTION SYSTEM

Every equipment backpack comes with the Petrol Bags CoverUp - an easy-to-use, removable cover that offers an extra level of protection from damage from adverse weather, sun, and dust.

7-LAYER PROTECTION SYSTEM

Petrol's exclusive 7-Layer Protection system forms a wall of security that guards valuable production equipment against the bumps and jolts of transport. Seven specially selected materials are bonded together for strength and durability over the life of every Petrol product:

1. Brushed Polyester
2. High-Density Open Cell Foam
3. AEPA/EVA Crosslink Close-cell Foam
4. ABS Honeycomb Frame
5. Thermo Forming Polypropylene Board
6. High-Density 900D Fabric
7. Injection-molded polypropylene

The result is Petrol's unprecedented degree of stability and equipment protection.

INNOVATION

ALWAYS THINKING OUT OF THE BAG

REMOVABLE LED LIGHTING SYSTEM

Many Petrol Bags come equipped with a removable internal LED lighting system that helps illuminate the bag's interior makes contents much easier to identify and organize. The lights are easily installed or removed anywhere inside the bag via hook and loop material. Powered by 2 standard AA batteries, Item's code #PA1013.

ABSORBAPAD – REMOVABLE SHOCK-RESISTANT AND STEADY PAD

Petrol Bags' ingenious AbsorbaPad is molded from a thick layer of shock-resistant ethylene vinyl acetate (EVA). Attached by hook and loop material, it provides delicate equipment with an extra level of protection against accidental damage from the jolts and jostles that can occur during transit. A proprietary pattern of ridges and raised dots on the surface of the Pad provide a grip that helps to keep the camera steady and safe. It is an integral part of most of our shoulder bags, but can be added to any Petrol Bag. Item's code #PA1012.

EXCHANGEABLE LOGO FRAME

Many of Petrol Bags' equipment carrying systems are now outfitted with an external plastic exchangeable logo frame for personal branding. Users have the option of embroidering their own logo on fabric supplied with the bag, or a 3D logo for a more striking effect.

TRANSPORTATION

Petrol Bags understands the importance of easy transportation for the busy professional on the go. Our professional backpacks and carrying cases are especially designed to help you carry heavy production equipment with greater ease and comfort, even over long hauls and journeys to hard-to-reach locations.

BUILT-IN WHEELS AND TROLLEY

Petrol Bags built-in wheel and trolley system employs heavy-duty inline skate wheels and an adjustable, durable trolley handle to ensure smooth-gliding, jitter-free toting.

SNAPLOCK TROLLEY SYSTEM

The handy external wheel and tote assembly is the ideal way to comfortably transport many of the Black Deca bags. When not in use, the Snaplock folds into a compact, lightweight package designed for easy storage and transportation. Once a bag is placed on the Snaplock baseplate, the system attaches quickly to twin connecting brackets on the base of the bag. Item's code #PA1001.

ON BOARD

Most Petrol Bags meet the strict new airline regulation for carry-on luggage size. **Due to constantly changing airline regulations, please check with your carrier prior to departure.**

SAFEBACK INTEGRATED BACKPACK CARRYING SYSTEM

The Safeback integrated backpack carrying system is a key advantage of Petrol professional packs. Each component has been carefully developed for a perfect balance of maximum carrying comfort and optimum distribution of load. A 3D mesh fabric designed to encourage air to circulate and keep things cool.

GRIPLOCK – INTERLOCKING HANDLE

Petrol's exclusive Griplock is engineered for swift pickup and easy carrying. Matching segments of injection-molded polypropylene lock precisely together in a snap to form a lightweight ergonomic handle that provides a comfortable, steady handhold.

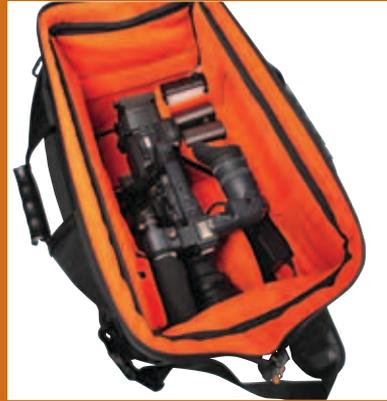

FAST AND EASY ACCESSIBILITY

Petrol Bags' ultra-wide openings and hallmark dual-directional easy glide zippers guarantee instant, effortless availability. Accessing your bag's contents takes just seconds.

DR. BAGS

Inspired by the traditional doctor's bag, Petrol's Dr. camera bags feature a hinged, extra wide opening for fast and easy access to the camera with mattebox and mic attached.

U-BAGS

Petrol Bags' proprietary ultra-wide U opening allows for quick and easy insertion and removal of your camera, without disturbing the viewfinder or microphone.

SHELL BAG

Petrol's ergonomic shell backpack unzips quickly and easily to expose the generous padded interior. The bag's unique opening system is designed to protect the backpack system from damage when placed on the ground.

SLING BAG

Petrol Bag's lightweight, over-the-shoulder Sling Bag unzips quickly to reveal a main compartment especially contoured to fit a DSLR camera with the lens attached. For quick deployment, the bag may be swung around to the front, and a handy quick release tab provides instant access to the gear within.

We travel the world extensively, from the high mountain ranges in the Himalayas and the extreme droughts in the Atacama desert, to the cold in the Arctic and the wet in the Amazon. During our productions we need to ensure we have only the best equipment, as there is nothing to fall back on if something fails. Of course, safeguarding our equipment is a serious issue. It all starts with good protection.

Our bag supplier Petrol Bags not only provides the strongest bags, but also the smartest bags. What's more, they make a special bag for every purpose, like their Inflatable Air-line Camera bag for traveling by plane.

DECA WIRELESS BAG

PS608

KEY FEATURES

1. Can be used to protect any sensitive equipment
2. Cold-molded laminate panels provide extra protection
3. 3 removable internal rigid dividers for custom configuration
4. Interior fully padded to safeguard contents
5. Twin straps of hook and loop material anchor top cover in open position for easy access
6. Zippered internal top envelope-style pocket of clear transparent mesh
7. Top divider separates flat items or paperwork
8. Padded carrying handle and adjustable shoulder strap

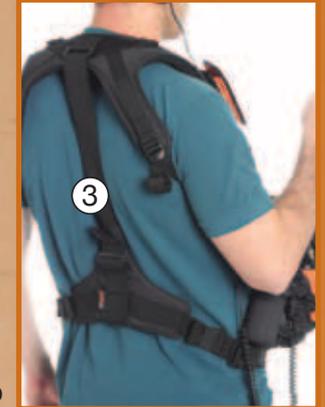

DECA HEAVY DUTY HARNESS

PS605

KEY FEATURES

1. The ideal system for comfortably carrying audio bags weighing up to 88 lbs. (40 kg)
2. Ergonomic "vest-style" design
3. "Ultimate adjustment" system employs airline-style straps and easy snap locks to get just the right fit
4. Fully padded to reduce strain on shoulders and lumbar region
5. Includes 1 expandable snap-on pouch to house transmitters or wireless receivers
6. Quick-release mechanism ensures fast attachment and removal of cargo
7. Extra "D" rings provided for holding cables or accessories
8. Special boom pole pocket attached to harness
9. Works with all Petrol Mixer Bags

SOUND MAN RAIN PONCHO

PS606

KEY FEATURES

1. The front section is made of transparent polyurethane for maximum visibility
2. Slotted "pass-through" hand openings on either side provide quick and easy access to controls
3. Long roomy sleeves provide freedom of motion
4. Two-sided bungee cords and anchor clips adjust the hood to keep out the elements
5. When not in use, fits into a handy drawstring net mesh pouch for easy storage
6. A "tile-style" opening on the back is designed to let fresh air flow inside and keep things cool

DOUBLE WIRELESS AUDIO POUCH

PS604

KEY FEATURES

1. Fits on the rear of camera to house wireless receivers and transmitters
2. Pockets link together "piggyback style" via easy-to-use quick-lock mechanism
3. Anchors securely to camera via hook and loop fabric-backed mounting plate or with screws

SNAPLOCK TROLLEY SYSTEM

PA1001

KEY FEATURES

1. When not in use folds into compact lightweight package for easy storage and transportation
2. Pulling up telescoping handle expands trolley to full size
3. Fits and comfortably carries many different models of Petrol camera bags (one at a time)
4. Attaches to special connecting brackets on the base of the bag
5. Oversized "quick release" button lets user add or release trolley with a single click

PERSONAL COMPUTER BACKPACK

PC305

KEY FEATURES

1. Front flap opens envelope-style for quick access
2. Internal laptop sleeve holds up to 15" laptop
3. Additional internal compartments for storing pens, paperwork etc.
4. Ergonomic backpack system and padded shoulder straps ensure optimal carrying comfort
5. Integrated fabric strap on back lets pack attach to trolley system

"When I shoot videos with my DSLR camera I need a lot of accessories. Most of these do not fit very well in a standard backpack. That's why Petrol designed the Digiback DSLR Backpack especially to hold all my DSLR video equipment and accessories. It provides both perfect protection and quick and easy access. The Digiback DSLR Backpack is my choice when I shoot videos DSLR style and need to get to remote and difficult locations"

Richard Walch, Photographer, Germany
Richard has been a professional photographer for 20 years.
He specializes in dramatic action shots of snow and water sports.

Petrol Bags

DSLR IN MOTION

A new line specifically designed to meet the special needs of users of DSLR cameras. The new DSLR in Motion series is designed to fit and safeguard most popular models of today's video-enabled DSLR cameras.

DSLR Product Line

DIGIBAG DSLR CAMERA BAG

PD221

KEY FEATURES:

1. Uniquely designed to transport and protect a video-enabled DSLR camera and important accessories
2. Top flap opens to provide quick and easy access to interior
3. Upper section of interior contoured to fit DSLR camera with lens attached
4. Hinged floor of section lifts to reveal twin pockets perfect for stashing extra lenses or spare batteries
5. Removable internal padded dividers help secure contents
7. Ergonomic carrying handle and padded shoulder strap

CAM 'N GO

PD332

KEY FEATURES

1. Protects video-enabled DSLR cameras and accessories
3. Removable internal padded dividers help secure contents
4. Zippered front compartment holds up to 17" laptop
5. Adjustable sternum and waist straps enable optimum weight distribution
6. Includes a removable rain cover

DSLR CAMPACK PLUS

PD335

KEY FEATURES

1. Protects video-enabled DSLR cameras and accessories
2. Removable internal padded dividers help secure contents
3. Secondary compartment holds up to 17" laptop
4. Ergonomic backpack system designed to provide correct weight distribution
5. System's center panel "bridge" of 3D mesh fabric designed to encourage air to circulate and keep things cool
6. Includes a flash memory card mini pouch (holds up to 4 cards)
7. Exterior front/side accessory pockets
8. Includes a removable rain cover
9. Exterior straps for carrying tripod

DSLR BACKPACKS

DIGIBACK AND DIGIBACK JR. DSLR BACKPACKS

PD331 / PD336

KEY FEATURES

1. Ergonomic shell design
2. PD336 has upper compartment contoured to fit DSLR camera with lens mounted
3. When outfitted with telephoto or other extra long lens, camera can be inserted vertically
4. Lower chamber has ample room for accessories
5. Removable internal padded dividers help secure contents
6. PD331 has space for holding laptop with up to 12" screen
7. Integral backpack system constructed of breathable 3D mesh
8. Double-sided pockets and bungee cord system for carrying and securing a small tripod
9. Includes a removable rain cover
10. Includes a flash memory card mini pouch (holds up to 4 cards)
11. PD336 includes a removable accessories pouch

* Included in PD331

cambio

Cambio

CARRY 'N SHOOT

Petrol Bags™ Cambio convertible equipment bag/camera support system is an industry first – a carry-on size smooth-rolling camera carrier that transforms into a lightweight support system for small video camcorders.

Cambio allows users to travel lighter, avoid waiting for baggage, and set up quickly once they've arrived at the location.

CARRY 'N SHOOT

- CA001** Includes 75mm ball head adapter only
- CA002** Includes 75mm CMH Cambio Micro Head

KEY FEATURES:

1. Carry-on size camera carrier transforms into lightweight support system for small video camcorders or DSLR cameras
2. Ultra-wide U-shape opening
3. Twin straps of hook and loop material anchor bag's front flap in open position
4. Main compartment has ample room to fit in camera and accessories
5. Petrol's proprietary sliding pipe system (SPS) secures camera and keeps it in place
6. Expandable (up to 56"/142cm) center steel column
7. Column can accommodate cameras weighing up to 9.9 lbs. (4.5kg)
8. Cast magnesium lever clamps ensure fast and sure column adjustment
9. Patent-pending frame and axle trolley with integral handle and camera platform with 75mm ball head mount adapter
10. Optional lightweight micro-fluid head allows for quick attachment and conventional pan and tilt movements (CA002)
11. Bag is braced by self-latching extendable aluminum double-bar tube leg
12. Leg expands and retracts quickly with just the touch of the latch paddle
13. Cambio's patented heavy duty, jitter-free wheels and axle can be chocked to prevent rotation and add extra stability
14. Many front and side pockets for additional storage
